Review report on the interim condensed consolidated financial information to the board of directors of Doha Bank Q.P.S.C.

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of Doha Bank Q.P.S.C. (the "Parent") and its subsidiaries (together "the Group") as at 30 June 2024 and the related interim condensed consolidated statements of income and comprehensive income for the three month and six month periods then ended, and the related interim condensed consolidated statements of changes in equity and cash flows for the six-month period then ended, and other explanatory notes. Management is responsible for the preparation and presentation of this interim condensed consolidated financial information in accordance with International Accounting Standard 34, 'Interim Financial Reporting' ('IAS 34') as issued by the International Accounting Standard Board (IASB). Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of review

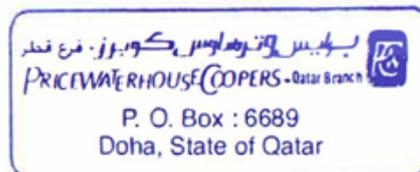

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of interim financial information performed by the independent auditor of the entity'. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with IAS 34.

6. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value hierarchy

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted market price (unadjusted) in an active market for an identical instrument.

Level 2 - Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3 - Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

For financial instruments that are recognised at fair value on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

6. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONTINUED)

Under level 3, the Group has designated FVOCI investments in a small portfolio of unlisted equity securities of non banking financial institutions.

The Group chose this presentation alternative because the investments were made for strategic purposes rather than with a view to profit on a subsequent sale, and there are no plans to dispose of these investments in the short or medium term.

The Management assumes that the fair value of financial assets and liabilities carried at a mortised cost are equal to the carrying value, hence, not included in the fair value hierarchy table. Fair value of investment securities carried at an amortised cost amounts to QR 6,076 million (31 December 2023: QR 7,270 million; 30 June 2023: QR 7,602 million).

Valuation techniques

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments the Group determines fair values using valuation techniques.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premium used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

The group values investment in equity classified as level 3 based on the net assets valuation method due to the unavailability of market and comparable financial information. Net assets values were determined based on the latest available audited/ historical financial information.

The foreign currency forward contracts are measured based on observable spot exchange rates, the yield curves of the respective currencies as well as the currency basis spreads between the respective currencies. All contracts are fully cash collateralised, thereby eliminating both counterparty and the Group's own credit risk.
