

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

1. INTRODUCTION:

Doha Bank Q.S.C is an entity domiciled in the State of Qatar and was incorporated on March 15, 1979 as a Joint Stock Company under Emiri Decree No. 51 of 1978. The commercial registration of the Bank is 7115. The address of the Bank's registered office is Doha Bank Tower, Corniche Street, West Bay, P.O. Box 3818, Doha Qatar.

The India branch of Doha Bank Q.S.C ("Doha Bank" or the "Bank") started since June 10th, 2014. The registered office of the Bank is Sakhar Bhavan, Ground Floor, Plot No. 230, Block No. III, Backbay, Reclamation, Nariman Point, Mumbai -400021, Maharashtra State, India.

2. SCOPE OF APPLICATION

The Basel III disclosure contained herein relate to the Indian branches of Doha Bank QSC (the Bank) as on 30th June 2018. These are the primarily in the context of the disclosure required under Annexure 18 - Pillar 3 disclosure requirements of the Reserve Bank of India (The RBI) Master Circular - Basel III capital regulation dated 1st July 2015. The Bank has implemented the requirement laid down by RBI for Pillar 3 disclosure, covering both the quantitative and qualitative items. The information provided has been reviewed by senior management and is in accordance with the guidelines prescribed by the RBI. All table DF reference relate to those mentioned in annexure 18 - pillar 3 of above mentioned circular.

Qualitative and Quantitative disclosure as per DF 1

The Bank does not have any reportable interest in subsidiaries/associates/ joint venture or insurance entities. As such this disclosure is not applicable to the Bank.

3. CAPITAL ADEQUACY:

Qualitative Disclosures:

The capital to risk weighted asset ratio (CRAR) of the Bank is 31.52% as of June 30, 2018 computed under Basel III norms, higher than minimum regulatory CRAR requirement of 11.5% including capital conservation buffer (CCB) of 2.5%.

The bank's capital management approach is driven by its desire to maintain a strong capital base to support the development of its business and to meet regulatory capital requirements at all times.

It is overseen by the Bank's local Assets and Liability Committee (ALCO) which is reporting to Global ALCO. It has process for assessing its overall capital adequacy in relation to the risk profile. The bank has developed a comprehensive Internal Capital Adequacy Assessment Process (ICAAP).

The Bank's ICAAP document covers the capital management framework of the bank, sets the process for the assessment of the adequacy of capital to support current and future activities / risk

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

and report on the capital projection for period 3 years. This framework is supplemented by the existing stress testing framework which is an integral part of ICAAP.

In the normal course of event, management reviews the adequacy of capital quarterly or with increased frequency, if circumstances demand. The capital requirement of the bank is assessed after considering bank's business model as well as opportunity for growth in India.

The capital assessment by the bank factors in the credit, operational and market risk associated with its current and future activities as well as the effective management of these risks to optimise the utilisation of capital.

Quantitative Disclosure:

A Summary of the bank's capital requirement for credit, market and operational risk and capital adequacy ratio as on June 30, 2018 is presented below:

Whichever is lower, so allowed	34,600
Total regulatory capital	2,962,090

4. RISK EXPOSURE AND ASSESSMENT

The Bank has identified the following risks as material to its nature of operations:

- ✓ Credit Risk
- ✓ Market Risk
- ✓ Operational Risk
- ✓ Interest Rate Risk in the Banking Book
- ✓ Liquidity Risk

Risk Management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Bank's risk management framework. Risk Management policies and systems are established to identify and analyze risks faced by the Bank. Doha Bank's Risk Management Group (RMG) operates through an independent enterprise-wide risk management framework. RMG consistently and continually monitors risks and processes across the organization to identify, assess, measure, manage and report on potential threats that could impact the achievement of Bank's objectives to optimize its risk management framework.

Risk Management policies, models, tools and systems are regularly reviewed to improve the framework and reflect market changes. The RMG is also independently empowered to escalate issues directly to the Board and Audit, Risk and Compliance Committee. Implementation of the Risk Management framework is entrusted to a highly competent team and is controlled and implemented through various senior level management committees chaired by the CEO - mainly in Credit, Operational Risk, Investment and Asset and Liability Committees. In addition, the Board level committees viz. Audit, Risk and Compliance Committee, reviews the observations and

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

findings of internal auditors, external auditors, compliance and the regulators to prevent deviations.

Credit Risk: General Disclosure

Qualitative disclosure

This refers to risk arising from the potential that an obligor is either unwilling to honor his/her obligation or has become unable to meet such obligation, which leads to economic loss to the bank or the possibility of losses associated with diminution in the credit quality of borrowers or counter parties and/or in the value of the collateral held by the Bank as security. Identification, measurement and management of risk are strategic priorities for the Bank and its credit risk is managed by a thorough and well structured credit assessment process complemented with appropriate collaterals wherever necessary and continuous monitoring of the advances at account and portfolio levels.

Credit Risk Management (CRM) Structure:

The CRM function is independent of the business functions. Such functions include policy formulation, underwriting and limit setting, exposure and exception monitoring, reporting, custody and monitoring of documentation, input of credit limits, classification of advances, remedial asset management, recovery of delinquent loan and determination of provision requirements.

The key objectives of CRM are to ensure:

- Bank-wide credit risks are identified, assessed, mitigated (wherever possible), monitored and reported on a continuous basis at customer and portfolio level;
- The Bank's exposure is within the risk appetite limits established and approved by the Board of Directors, which covers group and single obligor limits, borrower ratings, portfolio analysis, counter party limits and concentration of the limits to effectively measure and manage its credit risk;
- Review and assessment of credit exposures in accordance with the authorization structure and limits prior to facilities being committed to customers;
- Ensure completion of documentation and security creation as per approval terms before release of credit facilities to the clients. Monitoring the concentration of exposure to industry sectors, geographic locations and counter parties;
- Proactive and dynamic monitoring of the accounts as to the quality of the assets and to spot any ad-verse features/warning signs which can eventually lead to deterioration in the recovery prospects Engage the Business Units at an early stage itself to take corrective steps so that the exposure does not become unmanageable. Review of compliance with exposure limits

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

agreed for counter parties, industries and countries, on an ongoing basis, and review of limits in accordance with the risk management strategy and market trends;

- Prior to launching of new products, vetting the business proposals from risk perspective especially in light of delinquent reports.

Although the overall responsibility for managing the risks at macro level lies with the Board, the responsibility for identifying risk in Bank's credit exposure is entrusted to the Management Credit Committee. The Management Credit Committee shall review and decide on the following:

- The extent to which the Bank should assume credit risk, taking into account the capital base, the Bank's ability to absorb losses, the risk reward ratio, probability of default etc;
- The credit portfolio, including concentration trends, provisions, quality of portfolio and requirements vis à vis credit strategy and risk appetite;
- Portfolio concentration limits against Regulatory and Internal Limits set for counterparties, industry sectors, geographic regions, foreign country or class of countries, and classes of security;
- Business strategies to ensure consistency with the Bank's business/growth plan and other asset/liability management considerations;
- Significant delinquent credits (watch list and under settlement accounts) and follow up actions taken to safeguard the interests of the Bank;
- Adequacy of loan loss provisioning requirements.
- Establishment of an authorization structure and limits for the approval and renewal of credit facilities;
- Detailed credit policies, procedures and guidelines, proper segregation of duties, well defined authority matrix for credit approval and periodic audit and examinations by internal and external auditors to ensure that a rigorous environment of checks and balances exist within the Bank.

Credit quality

The Bank's credit risk systems and processes differentiate exposures in order to highlight those with greater risk factors and higher potential severity of loss.

Special attention is paid to problem exposures in order to accelerate remedial action. The Bank uses a Remedial Asset Management unit under the Credit Risk Department adopts corrective action on delinquent credits so as to recover the bank dues.

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

Impairment assessment

It is the Bank's policy to create allowances for impaired loans promptly and consistently.

Maximum exposure to credit risk

The Bank's exposure to credit risk is spread across a broad range of asset classes, including derivatives, loans and advances to customers, loans and advances to banks, and financial investments.

Concentration of exposure

Exposure to a person, company or group (the Single Borrower Lending Limit) is restricted to maximum 15% of Bank's Capital funds, subject to any regulatory dispensations.

Credit quality of financial instruments

All loans and advances in the Bank are classified according to asset quality. Standard accounts include all facilities which demonstrate good financial condition, risk factors and capacity to pay in line with the original terms of sanction.

Quantitative disclosure

Total gross credit risk exposures including geographic distribution of exposure as on June 30, 2018.

Credit Risk: Portfolios under the standardised approach:

Qualitative Disclosures

The Bank uses external rating agencies that are approved by the RBI for capital adequacy, viz, CRISIL, ICRA, and CARE for domestic exposures and S&P, Moody's and Fitch for overseas exposures.

The Bank also has an independent internal ratings model. These internal ratings are used for ascertaining credit worthiness of a client, setting internal prudential limits, determining pricings etc. The internal and external ratings do not have a one to one mapping and for the purpose of calculation of the capital for the credit risk under the standardized approach, the external ratings are used.

Quantitative Disclosures

The exposure under each credit risk category is as follows:

	(Rs '000)
<i>Risk Bucket</i>	<i>Amount</i>
Below 100% Risk Weight	10,622,943
100% risk weight	6,115,650
More than 100% risk weight	-
	16,738,593

Credit Risk Mitigation: Disclosures for standardised approaches

Qualitative Disclosures

It is the policy of the bank to obtain collaterals for all corporate credits, unless the business case warrants clean lending. Collaterals stipulated are usually mortgages, charge over business, stock and debtors, financial instruments. Cash Security is however recognized only as a fallback option and repayment of facilities are primarily sought from the cash flow of the borrower's business. However, collateral may be an important mitigant of risk. The bank has adopted norms of valuation of collateral as stipulated in the prudential guidelines of RBI.

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

Quantitative Disclosures

The total exposure covered by eligible financial collateral after application of haircuts as June 30, 2018 is given below:

(Rs '000)	
<i>Advances covered by Financial collateral</i>	<i>Amount</i>
Exposure before Credit Risk Mitigation	16,738,593
Exposure after Credit Risk Mitigation	16,635,571

(Rs '000)	
<i>Exposure e covered by guarantees</i>	<i>Amount</i>
Funded exposure covered by Guarantees*	-
Non Funded exposure covered by Guarantees*	-

Securitisation: disclosure for standardised approach as per table DF 6

Not applicable as the Bank has not undertaken any securitization transaction during the current period.

Market risks in the trading book

Qualitative disclosures as per table DF 7

Market Risk: This is the risk of loss arising from unexpected changes in financial indicators, including interest rates, exchange rates, bonds, equities and commodity prices. Bank has an active Management Information System to keep the Management and Investment Committees informed about the changes in market risk on the investments book. The prominent risks affecting the Bank are currency, interest rate and equity price risk.

The principal objective of market risk management of non-trading portfolios is to optimise net interest income. Market risk in non-trading portfolios arises principally from mismatches between the future yield on assets and their funding cost as a result of interest rate changes. Analysis of this risk is complicated by having to make behavioural assumptions regarding the economic duration of liabilities which are contractually repayable on demand, for example, current accounts. ALCO regularly reviews that these portfolios are managed within pre-approved interest rate risk limits.

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

Management of market risks

The Bank separates its exposure to market risk between trading and non-trading portfolios. Trading portfolios include positions arising from market making and proprietary positions together with financial assets and liabilities that are managed on a fair value basis. The management has set in place various limits as tool to control the risk and it is monitored by Head Office.

Overall authority for market risk is vested in ALCO. Risk Management is responsible for the development of detailed risk management policies, subject to review and approval by ALCO/Board and for the day-to-day review of their implementation. As a risk control mechanism limits are put in place for foreign exchange open positions. Positions are managed and monitored on an on going basis by the Treasury. Periodical reporting is made to ALCO who deliberate on the issue and give necessary guidance to Treasury.

Stress testing: Bank wide stress tests form an integral part of the risk review process and provide sufficient insight into the financial health and risk profile of the bank. Stress tests also provide early warning signs of potential threats to the Bank's capital. Doha Bank adopts a comprehensive stress testing framework in line with RBI circulars.

In particular the bank measures the impact of different stress scenarios on its capital adequacy ratio, net interest margin, profit after tax, return on assets, liquidity asset ratio and additional liquidity requirements.

The capital requirements for market risk are as follows:

<i>Particulars</i>	<i>(Rs '000)</i>
Interest Rate Risk	18,913
Equity position risk	56
Commodities position risk	-
Foreign Exchange risk	250,000
	268,969

Operational Risk:

Qualitative disclosures

Operational Risk: Operational Risk is the risk of loss arising from inadequate or failed internal processes, people and systems, or from external events. The Bank follows Head office's detailed policies and procedures and Operational Risk Management tools that are regularly updated to ensure a robust internal control mechanism for the Bank. The Bank continues to invest in risk management and mitigation strategies, such as a robust control infrastructure, business continuity management or through risk transfer mechanisms such as insurance and outsourcing.

The Bank has a well defined operational risk framework and an independent operational risk

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

function. The Head of Operational Risk is a member of the Operational Risk Management Committee and reports to the Head of Risk Management. The Operational Risk Management Committee oversees the implementation of an effective risk management framework that encompasses appropriate systems, practices, policies and procedures to ensure the effectiveness of risk identification, measurement, assessment, reporting and monitoring within the group.

In addition, the Internal Audit department of Head Office carries out an independent assessment of the actual functioning of the overall Operational Risk Management Framework. Each business segment must implement an operational risk process which is consistent with the requirements of this framework.

The process of Operational Risk Management includes the following steps:

- Effective staff training, documented processes/ procedures with appropriate controls to safeguard assets and records, regular reconciliation of accounts and transactions, process of introducing new products, reviews of outsourcing activities, information system security, segregation of duties, financial management and reporting are some of the measures adopted by Doha Bank to manage the Bank wide operational risk;
- Reporting of any risk event (losses, near misses and potential losses), which is used to help identify where process and control requirements are needed to reduce the recurrence of risk events. Risk events are analyzed, reported, mitigated, recorded on a central database and reported quarterly to the Board of Directors;
- Reporting of any risk event (losses, near misses and potential losses), which is used to help identify where process and control requirements are needed to reduce the recurrence of risk events. Risk events are analyzed, reported, mitigated, recorded on a central database and reported quarterly to the Board of Directors;

Interest rate risk in the banking book (IRRBB)

Qualitative disclosure

Interest Rate Risk: This risk largely arises due to the probability of changes in interest rates, which may affect the value of financial instruments or future profitability. The Bank is exposed to interest rate risk as a result of mismatches or gaps in the quantum of Assets and Liabilities and Off Balance Sheet instruments that mature or reprice in a given period. Since most of the Bank's financial assets such as loans and advances contain an option to reprice, majority of the bank's interest rate risk is hedged naturally due to simultaneous repricing of deposits and loans.

Quantitative Disclosures

As per stress tests prescribed by Reserve Bank of India, the impact of an incremental 200 basis points parallel fall or rise in all yield curves at the beginning of the year on net interest income for the next 12 months amounts to Rs 71,350 thousand.

DOHA BANK QSC - INDIA OPERATIONS

DISCLOSURES UNDER PILLAR 3 OF THE CAPITAL ADEQUACY FRAMEWORK (BASEL III GUIDELINES) AS ON 30th JUNE 2018.

General disclosure for exposures related to counter party credit risk

Qualitative disclosure

The banks has stipulated limit as per the norms on exposure stipulated by the RBI for both fund and non fund based product including derivatives. Limits are set as per the percentage of the capital fund and monitored. The utilisation against specified limits is reported to the credit committee on a periodic basis. The analysis of the composition of the portfolio is presented to the local management committee on a half yearly basis.

Credit control department monitors the credit excess (including Fx / derivatives exceeding approve limit) on daily basis. The credit exposure arising on account of interest rate and foreign exchange derivatives transaction is computed using the "current exposure method" as laid down by RBI.

Exposure to central counterparty arising from over the counter derivative trades, exchange traded derivatives transaction and security financing transaction (SFTs) attracts capital charges applicable to central counter party.

Applicable risk weight for trades guaranteed by central counterparties which recognised as Qualifying Central Counter Party (QCCP) by the RBI or SEBI, are comparatively lower than OTC deals.

In India, presently there are four QCCPs namely Clearing Corporation of India (CCIL), National Securities Clearing Corporation Ltd (NSCCL), India Clearing Corporation Ltd (ICCL) and MCX - SX Clearing Corporation Ltd (MCX - SX CCL). These CCPs are subjected, on an ongoing basis, to rules and regulation that are consistent with CPSS - IOSCO Principal for Financial Market Infrastructures

Bank has computed the incurred Credit Valuation adjustment (CVA) loss as per Basel III master circular and same has been considered for reduction in derivative exposure computation.
